

## ArtnCite

ArtnCite is a revolutionary art and culture movement. The mission of ArtnCite is to encourage, promote and support the workers and downtrodden masses of the world and their allies, without government grants or sugar daddies, in using art and culture as tools in the elimination of all exploitation and oppression in the world.

ArtnCite is about engaging women, children and men in creating and participating in art and culture in all its manifestations—drawing, painting, sculpture, poetry, theater, street theater, filmmaking (even with our cell phones), photography, crafts, dance, writing (of all kinds) and music, to name a few, primarily for liberation.

Today, monopoly capitalists/global gangsters run the world. Their world features vast poverty that makes poor against poor violence inevitable. They foment violent divisions among working class and poor people of different nationalities. In the U.S. the criminal, criminal justice system features massive incarceration; which is a part of a genocidal, new Jim Crow system with “ex-offender” replacing race. There is constant police brutality and murder from highly militarized police forces, coupled with outright fascism as government policy.

Privatization is the mantra of the rich, ruling class as they gouge super profits from everything moving; including education and illness. They control the very government, itself, through lobbyist and money favors. Their system features ever expanding union busting and deeper and deeper exploitation of workers, alongside the enslavement of immigrants, and prisoners at home and sweatshop labor abroad.

Second only to force of arms, is the gargantuan ability of the ruling class to create public opinion favorable to their rule. They do this through the ownership of TV and radio stations, newspapers, movies and their distribution systems, music, control of school and university systems, billboards, magazines, video games and more, thus colonizing the very minds of the people

ArtnCite is driven to go far, wide and deep to use whatever tools we have, to create and promote art and culture for beauty, joy and to create public opinion that exposes the capitalist system of exploitation and oppression and that helps pave the path to the bright future of collective ownership of the resources of the world, by the vast majority of the people of the world.

**GO ALL OUT TO CREATE ART FOR LIBERATION!!!**
